Interfaith Power and Light

A faith based response to global climate

Interfaith Power and Light

inspires and mobilizes people of faith and conscience to take bold and just action on climate change.

All Saints Episcopal Church
Wolfeboro, NH

As people of faith, we are called to be stewards of the Earth and as such, we must respond to the ecological and economic crises facing our island home. The primary work of Interfaith Power and Light is to inspire and mobilize people of faith and conscience to take and just action on climate change resulting from greenhouse gas emissions.

NH IPL will be a resource for congregations and their members who wish to lower their carbon footprints through energy efficiency, conservation, and renewable energy use to make a difference in fighting climate change. With the support of national, NH IPL will work with NH congregations and their members to model energy stewardship in their communities, reaching out to them, providing resources and support.

Our actions in our houses of worship is not enough. In addition to promoting energy stewardship in our facilities, NH IPL will bring a prophetic voice, responding to injustices of climate change with a vision of how our world can be more loving, healthy, and equitable. We will call for legislation to address the urgency of the climate crisis and seize the opportunity to create a new, more just and livable world for communities and our sacred Creation.
